
4 APRIL

International Day of Mine Awareness

**#TOGETHER
AGAINST
MINES**

In over **60 countries**, the dangers of landmines, cluster munitions and other explosive remnants of war still impact the lives of millions of people.

These indiscriminate killers continue to take too many lives: More than 20 men, women and children are killed or maimed every day.

In the lead up to April 4, show your support for a mine-free world and help keep the issue on the international agenda.

How to engage:

1. Download the red triangle from the website and print it out – or draw it yourself
2. Take a picture with the triangle
3. Upload it to Instagram, Twitter or Facebook using *#TogetherAgainstMines*
4. Share it with your friends – the more we are, the greater the impact!

Let's raise our voice together!
